

Malika Harmaien

Aspiring AI Engineer — Python — Machine Learning — Generative AI — LLMs — RAG

Bengaluru, India — harmaienmalika@gmail.com — LinkedIn — GitHub

Professional Summary

B.E. Information Science and Engineering student focused on building practical AI-powered solutions using Python, Machine Learning, Generative AI, Large Language Models, Retrieval-Augmented Generation, and Computer Vision. Hands-on experience through AI, data analytics, and Python internships, with projects involving LLM applications, multi-agent systems, computer vision, model monitoring, and AI-powered application development.

Education

Don Bosco Institute of Technology (DBIT), Bengaluru

B.E. in Information Science and Engineering

2023 – 2027

CGPA: 8.93/10

Experience

Artificial Intelligence Intern

XTRAGRAD PVT LTD

Aug 2026

Remote

- Applied Python-based Artificial Intelligence and Computer Vision techniques to develop and evaluate project solutions.
- Developed and presented an AI-based project, gaining hands-on experience in practical AI application development.

Data Analyst Intern

BeeSkilled

Jul 2026 – Aug 2026

Remote

- Analyzed datasets using Python and data-processing tools to identify patterns and derive meaningful insights.
- Performed data exploration and analysis to support data-driven conclusions.

Python Programming Intern

CodSoft

Mar 2025 – Apr 2025

Remote

- Developed Python programming projects as part of the virtual internship.
- Applied programming and problem-solving techniques to build practical applications.

Projects

AI-Powered Model Monitoring & Data Drift Detection

Ongoing

- Developed an AI-based model monitoring system focused on detecting data drift and supporting automated model retraining.
- Designed the system to improve machine learning model reliability under changing data distributions.
- Published research on the system in the International Journal of Scientific Research and Engineering Development (IJSRED).

LifeBridge AI — AI-Powered Emergency Response Platform

GitHub

- Built an AI-powered emergency response and disaster assistance platform using Gemini, FastAPI, and Next.js.
- Implemented a multi-agent workflow for handling emergency-response tasks.
- Deployed a full-stack AI application with separate frontend and backend services.

CodeOrbit AI — GitHub Repository Intelligence Assistant

GitHub

- Built an AI-powered GitHub repository assistant using Large Language Models and Retrieval-Augmented Generation.
- Integrated LangChain, FAISS, FastAPI, Streamlit, and GitHub APIs for repository analysis and intelligent querying.
- Developed the project as part of the IBM Bob Hackathon with lablab.ai.

Additional Projects

AI-Based Online Exam Proctoring System

GitHub

- Developed a computer-vision based system for detecting abnormal activities during online examinations.
- Applied OpenCV and deep learning models including DenseNet121, InceptionV3, Inception-ResNet-v2, a custom CNN, and YOLOv5.
- Deployed the application using Streamlit.

Study Time vs Marks Prediction Dashboard

GitHub

- Built an interactive study planner and exam marks prediction dashboard using Python and Streamlit.
- Implemented a custom rule-based prediction approach based on study hours and study intensity.
- Developed an interactive dashboard for visualizing study-related inputs and predicted marks.

Urban Heat Hyperlocal Mapping

GitHub

- Developed a hyperlocal urban heat mapping system using geospatial analytics and heat-related data.
- Built an interactive Streamlit and Folium dashboard for visualizing heat hotspots and data-driven insights.

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

AI / Machine Learning: Machine Learning, Generative AI, LLMs, RAG, LangChain, Computer Vision, Scikit-learn

Frameworks: FastAPI, Flask, Streamlit, React.js, Node.js

Libraries: Pandas, NumPy, OpenCV

Database: MySQL

Tools: Git, GitHub, VS Code, Jupyter, Google Colab

Certifications

- Python Essentials (Fast Track) — Decoding Data Science
- 5-Day AI Agents: Intensive Vibe Coding Course — Kaggle
- PARALLAX 2026 — AWS Cloud Club, DBIT
- IBM Bob Hackathon — lablab.ai

Achievements

- **1st Place** — AWS Certification Challenge Quiz
- **2nd Place** — Mastering AI Prompt, Context, and Harness Engineering Quiz
- Certificate of Appreciation — Academic Excellence, DBIT

Publication

AI-Powered Model Monitoring System with Data Drift Detection and Automated Retraining for Machine Learning Model

International Journal of Scientific Research and Engineering Development (IJSRED), Volume 9, Issue 4, July–August 2026.
