

Malika Harmaien

Aspiring AI Engineer | Python | Machine Learning | LLMs | RAG
Bengaluru, India | harmaienmalika@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Final-year B.E. Information Science and Engineering student at Don Bosco Institute of Technology with a CGPA of 8.93/10, focused on building practical AI-powered solutions using Python, Machine Learning, Generative AI, LLMs, RAG, and Computer Vision. Hands-on experience in AI application development, data analytics, LLM applications, multi-agent systems, model monitoring, and AI-powered projects.

EDUCATION

B.E. in Information Science & Engineering, Don Bosco Institute of Technology (DBIT), Bengaluru 2023 – 2027

CGPA: 8.93/10

EXPERIENCE

Artificial Intelligence Intern **Aug 2026**
Remote
XTRAGRAD PVT LTD

- Applied Python, Artificial Intelligence, and Computer Vision techniques to develop, evaluate, and present practical AI-based solutions.

Data Analyst Intern **Jul 2026 – Aug 2026**
Remote
BeeSkilled

- Analyzed datasets using Python and data-processing techniques to identify patterns, derive insights, and support data-driven conclusions.

Python Programming Intern **Mar 2025 – Apr 2025**
Remote
CodSoft

- Developed practical Python projects while applying programming fundamentals, problem-solving techniques, and application development concepts.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

AI / Machine Learning: Machine Learning, LLMs, RAG, LangChain, Computer Vision, Scikit-learn

Frameworks: FastAPI, Streamlit, React.js, Node.js

Libraries: Pandas, NumPy, OpenCV

Databases: MySQL

Tools & APIs: Git, GitHub, VS Code, Jupyter, Google Colab, GitHub API, Gemini API

PROJECTS

AI-Powered Model Monitoring and Data Drift Detection Research Project **2026**

- Developed an AI-based model monitoring system for detecting data drift and supporting automated model retraining to improve ML model reliability under changing data distributions; published in IJSRED.

LifeBridge AI – AI-Powered Emergency Response Platform **2026**

- Built an AI-powered emergency response platform using Gemini, FastAPI, and Next.js, implementing a multi-agent workflow with separate frontend and backend services.

CodeOrbit AI – GitHub Repository Intelligence Assistant **2026**

- Built an LLM and RAG-powered GitHub repository assistant using LangChain, FAISS, FastAPI, Streamlit, and GitHub APIs for intelligent repository analysis and querying.

AI-Based Online Exam Proctoring System **2026**

- Developed a computer-vision-based online exam proctoring system using OpenCV, DenseNet121, InceptionV3, Inception-ResNet-v2, custom CNN, and YOLOv5, deployed through Streamlit.

Urban Heat Hyperlocal Mapping **2026**

- Developed a hyperlocal urban heat mapping system using geospatial analytics with an interactive Streamlit and Folium dashboard for visualizing heat hotspots.

ACHIEVEMENTS

- 2nd Place** – Mastering AI Prompt, Context, and Harness Engineering Quiz

- Certificate of Appreciation** – Academic Excellence, DBIT

CERTIFICATIONS

- Python Essentials (Fast Track) – Decoding Data Science
- 5-Day AI Agents: Intensive Vibe Coding Course – Kaggle
- PARALLAX 2026 – AWS Cloud Club, DBIT
- IBM Bob Hackathon – lablab.ai

PUBLICATION

AI-Powered Model Monitoring System with Data Drift Detection and Automated Retraining for Machine Learning Model

International Journal of Scientific Research and Engineering Development (IJSRED), Volume 9, Issue 4, July–August 2026.
